THE RIGHTLINE OF PRODUCTS TO DELIVER PERFECT TURF.

Product Information Guide

HERBICIDES

PRODUCT	CONTAINER SIZE	PRODUCT FEATURES
ADDIT® Same active ingredient as QUICKSILVER®.	4 x 64 oz 10 x 8 oz 8 oz Tip and Measure	The first post patent option of Carfentrazone in turf. Carfentrazone rapidly penetrates into the plant cells and visible weed control may be apparent on foliage of susceptible weeds in 24 hours or less. Use as a tank mix partner with 3-way herbicides for greater efficacy, broader weed control and quicker knockdown of broadleaf weeds. Labeled for use on most cool and warm season turf in the following sites: residential, commercial, and institutional lawns, golf courses, schools, and sports facilities.
CREEDENT® Same active ingredient as CERTAINTY®.	10 x 1.25 oz 6 x 12.5 oz	Provides unique opportunity for selective, post-emerge weed control in warm-season turf and ornamentals. Exceptional control of sedges and kyllinga. It offers the flexibility to be applied to a wide range of warm-season turfgrasses including Bermudagrass, Bahiagrass, Buffalograss, Centipedegrass, Kikuyugrass, Seashore paspalum, St. Augustinegrass and Zoysiagrass. Labeled for use in residential and commercial sites, sod farms and certain golf course applications. Ideal choice for selective weed control in managed turf or landscape settings.
DITHIOPYR 2 EW Same active ingredient as DIMENSION® 2EW.	2x2.5 Gal 30 Gal drums	 Dithiopyr 2 EW herbicide provides Pre-emergent and early Post-emergent control of crabgrass up to 5 leaf stage. Provides Pre-Emergent control of grassy and broadleaf weeds such as Crabgrass, Dallisgrass, Foxtail, Sandbur, Dandelion, Oxalis, Spurge, and many other annual grasses and broadleaf weeds in established lawns, commercial sod farms, sports turf, golf course fairways, roughs, tee boxes, unimproved turfgrass areas, container grown ornamentals, field-grown ornamentals, and landscape ornamentals.
ETHO 4 SC Same active ingredient as PROGRASS®.	4 x 64 oz	A selective turf herbicide used to control Annual Bluegrass (Poa Annua) and many other annual grasses and broadleaf weeds. Effective through weed germination and early emergence, the product may be used on Bentgrass, Tall Fescue, St. Augustinegrass, Kentucky Bluegrass and Perennial Ryegrass.
MESOTRIONE 4 SC Same active ingredient as TENACITY®.	4 x 64 oz 10 x 8 oz 8 oz Tip and Measure	A broad spectrum soil residual herbicide used for establishing cool season turfgrass species and eliminating select weeds in established turfgrass. This product can be applied to both commercial and residential turfgrass. Non-crop area use sites include: golf courses (NOTE: not labeled for use on golf course greens), sod farms, athletic fields, parks, residential and commercial properties, cemeteries, airports, and lawns.
PRONAMIDE 3.3 SC Same active ingredient as KERB® SC T/O.	4 x 1 Gal	Provides excellent pre-emergent and some post emergent control of a variety of weeds commonly found in warm season turfgrass. Known for its ability to control Annual Bluegrass (Poa Annua) in warm season turfgrass stands. General Use product.
SULFEN 4 SC Same active ingredient as DISMISS®.	4 x 64 oz	Contains Sulfentrazone. Product has a great technical fit for weed control in both warm season and cool season turfgrass. May also be used on railroads, highways, roadsides, pipelines and utility rights of way, industrial areas, fence rows, and other listed non-crop sites.
SULFEN SOUTHERN Same active ingredient as DISMISS® South.	4 x 64 oz	Formulated as a flowable (suspension concentrate) containing Imazethapyr and Sulfentrazone. May be used in the following turf areas: golf fairways and roughs, residential, commercial, institutional lawns, sod farms, and athletic fields. For use on Warm Season Turf including St Augustine. Controls Yellow and Purple Nutsedge, Kyllinga, Doveweed and suppression of Dallisgrass and Virginia Buttonweed.
SULFENCORE Same active ingredient as DISMISS® + SENCOR® UNIQUE PROPRIETARY PRODUCT	2 x 12 lb	A water soluble dry flowable formulation containing Metribuzin and Sulfentrazone for selective post emergence weed control in Bermudagrass. Modes of action involve product uptake by weed roots and shoots. Labeled for use in the following turf areas: golf course fairways and roughs, residential, institutional lawns and athletic fields. Exceptional control of Goosegrass, Sedges and Kyllinga
LOYALTY® 10XT Same active ingredient as DISMISS® NXT.	4 x 60 oz	Contains a combination of powerful active ingredients Carfentrazone and Sulfentrazone . Effective control of Yellow Nutsedge, Kyllinga and other labeled weeds on turfgrasses. Provides a quick and long-lasting result in controlling unwanted weeds on both cool and warm-season turf and enhanced tuber mortality to help reduce growth of future sedge populations. Its fast-acting formula shows visible results within 24 hours after application. Ideal for use on residential, commercial and institutional lawns, athletic fields, sod farms, golf course, and other non-crop sites.
LOYALTY® WDG UNIQUE PROPRIETARY PRODUCT	 20 x 8 oz 4 x 2.66 lb	A selective foliar and soil applied herbicide for pre and post emergent control of specific grasses, sedges, and susceptible broadleaf weeds in both cool and warm-season turf . Formulated as a 75% water dispersible granule containing the active ingredient Sulfentrazone. Allows for Sulfentrazone applications in higher ambient temperatures. Fast acting weed control results seen often in less than 24 hours. For use in turfgrasses, industrial areas, fence rows, and other listed non-crop sites.

PLANT GROWTH REGULATORS

PRODUCT	CONTAINER SIZE	PRODUCT FEATURES
GROOM® PGR Same active ingredient as PRIMO MAXX®	2 x 2.5 Gal 2 x 1 Gal	RightLine GROOM PGR is a micro-emulsion concentrate formulation of Trinexapac Ethyl. GROOM is used to manage turf growth and improve overall turf quality and stress tolerance. Used on warm and cool season turf. GROOM Improves color, lateral stems and root mass development while inhibiting vertical shoot growth. GROOM is the Right product for healthy, durable blades in turf grass.
PACLO 2 SC Same active ingredient as TRIMMIT®.	4 x 1 Gal	Slows the vertical growth of turf. Reduces mowing frequency by up to 50% for 6 to 8 weeks or more. Increases greening and density for up to 12 weeks. Suppresses Annual Bluegrass (Poa Annua) in cool season grasses, including putting greens. Improved and extended fertilizer performance for up to 12 weeks.
PROHEX 27.5 WDG Same active ingredient as ANUEW®.	4 x 6 lb	Late-Stage Plant Growth Inhibitor which improves turf quality, density, and appearance. Reduces turf growth and mowing frequency. Strongly regulates Annual Bluegrass (Poa Annua) providing favorable turf growth in mixed stands. Reduces amount of clippings. Unique packaging in 6 lb bottles is favored by end users.

INSECTICIDES/ NEMATICIDES

PRODUCT	CONTAINER SIZE	PRODUCT FEATURES
NEMAMECTIN™ 0.7 SC Same active ingredient as DIVANEM®. *Restricted Use Product	4 x 1 Gal	Provides broad-spectrum control of Parasitic Turf Nematodes including Root-Knot, Lance and Sting. Safe for use on all golf course turfgrass species. Also now labeled for Higher Rate Spot Treatments on golf courses and professional and collegiate sports fields. The product promotes root growth and drought tolerance on greens, tees and fairways.
LAMBDA 1 EC Compare to SCIMITAR®. *Restricted Use Product	4 x 1 Gal	Provided Broad Spectrum insect control for Golf Courses, Lawns and Landscapes. Contains the active ingredient Lambda-Cyhalothrin, a leading synthetic pyrethroid.

FUNGICIDES

PRODUCT	CONTAINER SIZE	PRODUCT FEATURES
CHILLOUT™ Same active ingredient as HONOR®.	 6 x 3 lb	A powerful combination fungicide with the Right Agronomic coverage for the golf course markets. As a combination of Boscalid + Pyraclostrobin, the product covers both soil born and foliar turf diseases. If you are targeting dollar spot, fairy ring, anthracnose, patch diseases or leaf spots...CHILLOUT! We have you covered with this Non-Agency alternative!
PROPI 1.3 MEC Same active ingredient as BANNER MAXX®.	2 x 2.5 Gal	Provides long-lasting disease control for more than 49 turf and ornamental diseases including: Dollar Spot, Summer Patch, Leaf Spot, Anthracnose, Brown Patch, Powdery Mildew, Rusts, Pink and Gray Snow Mold, Gray Leaf Spot, and Zoysia Patch.
AZOX 2 SC Same active ingredient as HERITAGE®.	4 x 1 Gal	Systemic mode of action provides long-lasting preventative and curative disease control of many turf and ornamental diseases including: Summer Patch, Leaf Spot, Anthracnose, Brown Patch, Spring Dead Spot, Powdery Mildew, Pythium Blight, Rusts, Pink and Gray Snow Mold, Gray Leaf Spot, and Zoysia Patch. It is labeled for broad-spectrum turfgrass disease control for both cool and warm season grasses, trees, shrubs, and flowers.
PROTOCOL® UNIQUE PROPRIETARY FORMULATION	 2 x 2.5 Gal	A systemic combination fungicide containing both propiconazole and thiophanate methyl. Provides dual action systemic fungal protection for lawn care and golf markets. Foundation sprays for protection against Gray Leafspot, Patch Diseases and Dollar Spot.

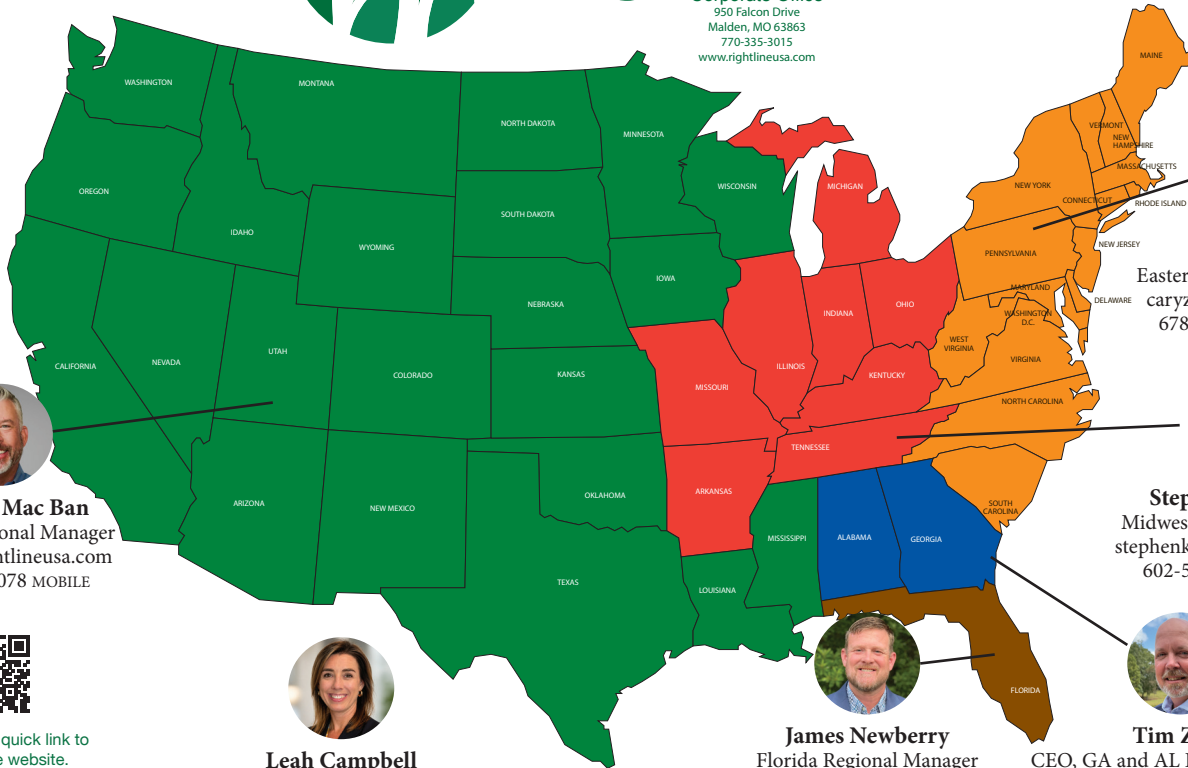

PROPRIETARY TURF ENHANCEMENTS

PRODUCT	CONTAINER SIZE	PRODUCT FEATURES
HEROIC™ 450 UNIQUE PROPRIETARY FORMULATION	NEW 2 x 2.5 Gal	A proprietary complete fertilizer that delivers the three primary plant nutrients in an entirely new manner. Novel Bio-available forms of Phosphorus and Potassium enable the product to provide HEROIC turf performance at historically impossible rates. With this new technology, the need for granular fertilizer will be less. In fact, 1 gallon of HEROIC 450™ replaces 200 LBS/ACRE DIAMMONIUM PHOSPHATE plus 250 LBS/ACRE SULFATE OF POTASH (which is where the 450 in the name comes from).
LIGHT IT UP UNIQUE PROPRIETARY FORMULATION WITH LOW USE RATES	2 x 2.5 Gal 4 x 1 Gal 275 Gal tote	A proprietary non staining formulation of Iron Glucoheptonate and Amino Acids. A liquid formulation that has excellent uptake and enters the plant tissue within 12 to 48 hours. Iron is an essential component of plant health and is required for chlorophyll formation, nitrogen fixation, and nitrate reduction. It produces rapid turf green-up without excessive growth on all types of turf. Use rates as low as 32 oz per acre.
C-SUITE CFO UNIQUE PROPRIETARY FORMULATION	NEW 50 x 2oz packs	A proprietary Executive Level Biological product designed to capture atmospheric nitrogen and break the bonds that tie up phosphorus and potassium in soils. By using a consortia of naturally occurring biologicals, packaged with the right food source, the product reduces the need for synthetic NPK products by gathering or releasing these key nutrients. Designed for sports fields but affordable for lawn care. May be used in blackout periods.
C-SUITE CSA UNIQUE PROPRIETARY FORMULATION	NEW 50 x 4.4oz packs	A proprietary Executive Level Biological product designed to speed turf recovery from insect damage and enhance the soil micro-sphere. The product contains naturally occurring strains of Beauveria bassiana, Trichodermas and other compounds to immediately improve soil structure. The dry product contains a food source for the microbes to thrive when placed in the spray tank.
