

RightLine®

GROOM® PGR

Groom® PGR is a microemulsion concentrate for managing turf growth, improving quality and stress tolerance, and edging of warm and cool-season turfgrasses.

RightLine®GROOM® PGR: a liquid microemulsion containing Trinexapac-ethyl, a gibberellic acid inhibitor. Vertical shoot growth is suppressed while lateral and below ground growth of rhizomes, stolons, tillers and roots is stimulated. **GROOM® PGR** may be used on the following turf areas: residential and commercial lawns, golf courses, sod farms, sports fields, cemeteries and other similar areas that are well maintained.

- Absorbed by foliar uptake and is rainfast after one hour.
- Use in conjunction with RightLine PROHEX 27.5 WDG (Prohexadione)
- Provides up to 50% suppression of turf growth
- Full growth regulation begins at about 3 – 5 days after application.
- When used with marking paint Groom PGR can extend the duration of marking visibility
- Use to minimize the need for edging turfgrass along sidewalks, driveways, flower beds, and trees.
- Packaged in convenient 2.5 gal containers

Turf Type	Application Rate (fl. oz./A)	Application Rate (fl. oz./1000 sq. ft.*)
Warm Season Turf	3-44	0.068-1.01
Cool Season Turf	6-44	0.137-1.01

*See label for specific rates and timing
