TRIBOLT™ UniTech® TRIADIMEFON FUNGICIDE

EXCEPTIONAL TRIADIMEFON CONTROL FORMULATED FOR MAXIMUM PERFORMANCE

Tribolt™ UniTech® is a low rate DMI systemic fungicide with a proven disease control record. The active ingredient in this acropetal penetrant fungicide is triadimefon which provides a wide spectrum of control on many of the toughest turfgrass & ornamental diseases. Tribolt UniTech also contains **Aquatrols' proprietary formulation UniTech** for maximum disease protection performance.

Protection Program

Tribolt UniTech is an excellent addition to both cool-season and warm-season turfgrass disease programs, controlling key diseases such as dollar spot, fairy ring, summer patch and take-all patch. Tribolt UniTech offers flexible preventative rates that will match any fairway protection program. Tribolt UniTech is also an outstanding protection choice for a wide variety of ornamental diseases.

KEY BENEFITS OF TRIBOLT UNITECH

- Systemic control of foliar, root, and soil diseases
- Excellent control of dollar spot and 12 other turfgrass diseases
- Preventative fairy ring control
- Fantastic tank mix partner with Aquatrols Wingspan UniTech on golf course turfgrass
- Controls over 25 ornamental diseases

DIRECTIONS FOR USE

WHERE TO USE:	For use on residential and commercial turfgrass including golf courses, residential lawns, commercial lawns and grounds, sod farms, and gardens or parks. Tribolt UniTech may also be utilized on ornamentals including plants, shrubs, shade trees and interior plantscapes. See label booklet for more detailed information.
WHEN TO USE:	Tribolt UniTech may be utilized as a preventative or curative application. See application rates for detailed information.
