

C-SUITE™

CSA

EXECUTIVE LEVEL BIOLOGY

A Consortia of Plant and Soil Beneficials for TURF:

Contains naturally occurring beneficial substances. Includes various strains of microbial species to improve soil structure and enhance turf recovery from biotic and abiotic stress.

Designed for turf recovery from insect damage and abiotic stressors

Manufactured by industry experts

A biological consortia approach instead of single strain biology

Food for biology included in formulation

Dry formulation designed for storage stability

Novel Product for the turf industry

No waiting! Add it. Mix it. Spray it.

University tested
