

RightLine®

PROTOCOL

The Right Product for Broad Spectrum Disease Control for Cool and Warm season grasses. Contains 23.7% Thiophanate-Methyl and 7.1% Propiconazole in one premix.

The RightLine® PROTOCOL combines Thiophanate-Methyl (FRAC 1) and Propiconazole (FRAC 3), two systemic modes of action, at the Right Rates and the Right Price. It provides broad-spectrum control of 21 turfgrass diseases including: Dollar Spot, Brown Patch, Anthracnose, Gray Leaf Spot, Summer Patch, Take-All Patch, Spring Dead Spot, Large Patch, and Pink and Gray Snow Mold. It is labeled for both cool and warm season grasses and certain ornamentals.

- Two systemic modes of action: FRAC Group 1 + FRAC Group 3
- Controls 21 listed turfgrass diseases
- Replaces a two-product tank mix
- Improves establishment of cool season turfgrasses
- High tank mix compatibility
- Labeled for both Turf & Ornamental applications
- Caution Signal Word
- Available in 2.5 gal. containers

Application Rate (Oz./A*)	Application Rate (Oz./1,000 sq. ft.*)
32 – 336 oz	0.75 – 7.8 oz

*See label for specific rates and timing, including ornamental rates
